

Flashing Yellow Left Turn Arrow

City of Eureka

City of Eureka
531 K Street
Eureka, CA 95501
Phone: (707) 441-4144
www.ci.eureka.ca.gov

The City of Eureka will retrofit a left turn signal at the Harrison Avenue & Buhne Street intersection with a new flashing yellow arrow signal to improve efficiency.

Flashing yellow arrow (FYA) signals are included in the State of California and Federal Highway Administration's Manual on Uniform Traffic Control Devices (MUTCD), which is the standard for signs, signals and pavement markings in the US. FYA's are being installed as part of an effort to increase traffic flow and maintain safety. These signals will reduce delay, improve safety, and provide more flexibility for variable traffic volumes.

What the arrows mean:

Steady red arrow:

STOP, drivers turning left must stop and wait.

Steady yellow arrow:

Left turn signal is about to change to red, driver should prepare to stop.

Flashing yellow arrow:

Drivers are allowed to turn left after yielding to oncoming traffic and pedestrians. Oncoming traffic has a green light.

Steady green arrow:

Left turns have the right of way. Oncoming traffic has a red light.

The City will be evaluating other existing traffic signal locations for flashing yellow left turn signal installations.

If you have any questions or comments about the flashing yellow left turn signals, please contact the Engineering Department at 441-4194.
